

SUMMARY

Software Engineer with hands-on experience in backend and full-stack web development using ASP.NET Core (.NET 8), Entity Framework Core, RESTful APIs, SignalR, JWT authentication, and role-based authorization. Experienced in designing database structures and working with SQL Server, PostgreSQL, and MongoDB, as well as building web applications with React.js, Next.js, TypeScript, and third-party service integrations. Strong foundation in API development, realtime communication, database design, frontend-backend integration, and deployment to VPS/Azure environments, with a clear focus on building reliable, maintainable, and scalable web systems.

SKILLS

Programming Languages: C#, Java, SQL, TypeScript	Frameworks/Libraries: ASP.NET Core (.NET 8), Entity Framework Core, RESTful APIs, SignalR, FastAPI, React.js, Next.js, HTML/CSS
Database: SQL Server, PostgreSQL, MongoDB, Relational Database Design	Cloud & Deployment: Docker, CI/CD, Azure, Vietnix VPS
Tools: Git, GitHub, Postman, Swagger	Third-party Integrations: PayOS, Cloudinary, Gemini API, STT/TTS, GHN API
Authentication & Security: JWT, Role-based Authorization	

EXPERIENCE

FPT Software Intern Back-end Developer Online Course Selling Platform Developed backend features for an e-learning platform supporting course search, registration, purchase, video lessons, learning materials, progress tracking, reviews, and certificates. Built and maintained RESTful APIs, database logic, and backend workflows for online course management. Collaborated on API testing, debugging, and feature integration.	09/2024 – 12/2024
AIDiner – Smart Restaurant Management System Back-end Developer Target: AI-assisted restaurant management system for customers, staff, and managers. Technologies: ASP.NET Core (.NET 8), SQL Server, Azure, Gemini API, React.js. Responsibilities: Built backend APIs for dish, ingredient, order, staff, and customer-facing features. Designed SQL Server database structures for menus, orders, staff, customer preferences, and recommendation data. Integrated Gemini API with STT/TTS for AI-powered dish recommendations and voice-based chatbot interaction. Implemented authentication, authorization, notifications, React.js integration, testing, and debugging.	01/2025 – 03/2025
AI-assisted English Speaking Practice Platform (AESP) – Capstone Project x FPT University Full-Stack Developer Target: Developed an AI-powered English speaking and pronunciation platform with placement testing, AI scoring, level-based learning paths, AI feedback, native-speaker review, coin rewards, and donation features. Technologies: ASP.NET Core (.NET 8), FastAPI, Next.js, TypeScript, SQL Server, Cloudinary, Vietnix VPS, PayOS Responsibilities: Built APIs for placement tests, level assignment, speaking practice, AI feedback, reviewer reviews, payments, coin transactions, and donations. Designed SQL Server structures for learners, reviewers, lessons, speaking attempts, AI scoring results, wallets, transactions, and review orders. Integrated FastAPI-based AI services to score pronunciation, detect speaking issues, and generate structured feedback. Implemented JWT authorization, PayOS payment, Cloudinary media storage, frontend-backend integration, VPS deployment, and system maintenance.	09/2025 – 12/2025

EDUCATION

FPT University - HCM Campus Bachelor Of Software Engineering	2022 – 2025
--	-------------

HONORS & AWARDS

FPT Software Internship Program Back-End Developer Intern	2024
AI-integrated Software Projects – Gemini API, STT/TTS, FastAPI, Cloud Deployment	2024 – 2025
Best Capstone Project Contribution AESP - FPT University	2025
